H1 held out (Eval A), incumbent C+G end-to-end run: which genes get called DE (p_adj < 0.05, own gene excluded)

A. Per knockdown: truth vs calls. Median true DE 218, median model calls 520; pooled recall 11%, precision 20%

B. Share of true DE genes the model calls (recall)

C. One knockdown (SIN3B): which genes are called
